SUMMARY

Technology professional with hands-on experience across internal platforms, enterprise IT systems, and full-stack web development. Proven ability to support and build secure, user-centric systems involving authentication, access control, and operational workflows. Comfortable working across frontend interfaces, backend services, and system environments, with a strong focus on reliability, clarity, and maintainability in multi-user and security-sensitive contexts.

CORE COMPETENCIES

IT & Platform Systems: Enterprise IT Support, Internal Platform Administration, User Access & Role Management, Incident Response & Troubleshooting.

Engineering & Web Technologies: Frontend Development (React.js), Backend Services (Node.js), RESTful APIs, Authentication (JWT, role-based access).

Systems & Environments: Linux System Administration Deployment & Configuration Support, Version Control (Git), Deployment & Configuration Support.

EXPERIENCE

IT Manager – Hogan Tech (Hogan Organization)

Nov 2025 – Present

- Led the implementation and ongoing development of **Hogan Hub**, an internal modular platform for managing users, permissions, and operational access.
- Designed and managed workflows for user onboarding, role assignment, password resets, and access revocation.
- Supported authentication and access-control mechanisms across internal systems.
- Worked closely with operations and management teams to align platform behavior with business and security requirements.
- Provided technical support and system oversight to ensure platform stability and usability.
